

# GRAIN NUTRIENT SAMPLING

procedure at farm's grain intake point

## 1. LABEL BUCKETS

Clearly label containers ready to collect grain from each field.

## 2. SAMPLE EACH LOAD

Take two half cupfuls from each trailer as it is being tipped and place them in the labelled bucket for the correct field.

## 3. SUB-SAMPLE INTO BAG:

When the whole field is harvested, mix the grain in each bucket and bag-up a sub-sample (~200g; 8oz), WITH ITS CORRECT LABEL

## 4. STORE & DESPATCH

When all fields have been harvested, complete despatch form, and send all together to your chosen lab. *AND ... RECORD YIELDS etc. on-line*
