

The Yield Enhancement Network

The YEN is an independent, industry-wide effort to improve crop yields for all. YEN estimates a field's potential max yield and identifies yield constraints.

Why join YEN?

- ✓ Grower networks for Cereals, Oilseeds, Peas, Beans, and Carbon
- ✓ **Lab analysis** of your soil & crop samples
- ✓ A comprehensive **post-harvest report on yield constraints**, which includes **benchmarking on +60 factors**
- ✓ Access to **new research** and contacts

The YEN is
administered by

Meet some of our growers

Mark Stubbs, Lincolnshire

"My experience with YEN is going to help me massively because it means I'm now more technically minded and I look at things rather than think we've always done that. Now we try different methods year after year....Best things about YEN are meeting like other minded farmers, being able to talk to them, see what they do."

David Passmore, Oxfordshire

"YEN really makes you think about what you're doing, why you're doing it, what you should be doing and also the report we get at the end of the year is probably the most detailed analysis of a field crop I've ever seen. Hopefully we can use that next year to carry on improving."
